

Glaciers Travel Brochure Project

Purpose: Create a travel brochure that features 8 of the 10 erosion and deposition land features caused by *glaciers*.

Instructions:

Please use a pencil to make your drawings first and then color them in with colored pencils, crayons, or felt pens. Please do not use sharpies because they will bleed through the paper.

1. Use pages 118-119 in your textbook to use as a visual guide. (Please don't copy, make it your own!)
2. Make a rough draft copy FIRST before getting your "good" piece of paper.
3. Fold the "good" piece of paper into thirds, where the left side flap covers the right side flap.

Paper Before Folding
(Glacier Vacation Site)

Right Side Folded In
(List of Attractions)

Left Side Folded In
(Front Cover)

4. Create a clever name for your travel agency or vacation destination. It's okay to be silly, but make sure it's appropriate. **(5 pts.)**
5. Design a colorful cover to draw the customers in! **(10 pts.)**
6. On the **Right Flap** of the brochure, number list eight **Attractions** (land features) the vacationers will experience. **(16 pts.)** Here's an example: "Take a refreshing dip in the glacial lake that's been forming for the last thousand years!"
7. Inside the pamphlet, draw the entire glacier vacation site that the people will visit. Make sure you include the individual land features highlighted in the brochure. **(10 pts.)**
8. Number the features that correspond to the **List of Attractions**.
9. Overall Creativity and Quality **(4 pts.)**
